Subject: Bremerton Gasworks Site

I wanted to give you both heads up that I provided EPA Site Manager for Bremerton Gasworks Site, Kathy Parker, Melissa's contact info. She is currently working with Mrs. Sesko to find a way to remove pontoons from site. She is discussing options with Thompson Pile Driving but I am unsure whether they are up for the task of doing job right. I told her you would have recommendations on who could do the work and what permits would be required.

I am glad to help with process but wanted to pass along in case I am sent out on fire.

Kathy's contact number is:
206-553-0062 Office
